

ABBEY PYNFORD

## UNDERPINNING

### Amport Place\_ London

**Value:** £300,000

**Size:** 500m<sup>2</sup>

**Duration:** 18 weeks

#### Scope of work:

- ▶ We were approached to produce a full underpinning scheme for these two semi-detached properties. We designed and constructed a voided raft incorporating a reinforced concrete retaining wall.
- ▶ The project included the demolition and removal of the existing floor structure, temporary works, and the demolition of the retaining walls.
- ▶ Due to the location, restricted access piling was required, utilising our mini piling rigs designed to fit through a standard doorway.
